INFO Assists and HMIs.pdf - information on taking the Final.

ROB 2040 Final.pdf - description requirements for each FINAL program.

Final PLC Programs.swf - program assist similar to the lab assignments.

ROB 2040 Final HMI.swf - requirements for the HMI, similar to lab HMI assignments.

Timer Instructions Summery for Final.pdf

Counter Instructions Summery for Final.pdf

Studio 5000

After testing the program, **DO NOT** go directly OFFLINE.

1. Go from **Rem Run** to **Rem Prog**.
2. Then, **Rem Prog** to **Offline**.

If you do not follow the above procedure the next HMI may not respond properly. All opened software will need to be closed, and the computer will need to be restarted.

ALL Studio 5000 and SIEMENS PROGRAMS

Type the Tag name correctly.

Equivalent terms:

- Set = voltage
- Reset = no voltage

Studio 5000 PROGRAMS

Notes on Tags:

- Notice which tags are Controller Tags and which are Program Parameter and Local Tags and assign correctly.
- Change to the correct Data Types for Boolean tags.
- Change to the correct Data Types for Timers and Counters.
- Use the correct Status Bits for the Timers and Counters.

SIEMENS PROGRAMS

- Create the Data Block for Boolean Tags.
- Change to the correct Data Types for Boolean tags.
- Timers and Counters Tag names are created when dragged onto the network.
- Use the correct Status Bits for the Timers and Counters.

FactoryTalk View SE HMI for Studio 5000

HMI Name: FINAL_HMI.cli

ONCE THE HMI MAIN MENU HAS BEEN STARTED, YOU DO NOT NEED TO STOP THE HMI WHEN TESTING OTHER THE PROGRAMS.

IN Studio 5000, YOU CAN DOWNLOAD A PROGRAM, GO TO RUN. AFTER TESTING RETURN TO PROGRAM AND OFFLINE MODES. CLOSE THE Studio 5000 PROGRAM AND OPEN A Studio 5000 PROGRAM WITHOUT STOPPING THE HMI MAIN MENU.

The HMI has a MAIN screen to select the other HMI for the Studio 5000 programs in the Final.

Each HMI screen for a program in the final has a MAIN MENU button.

This will close the current program HMI screen and return back to the MAIN HMI screen.

continued

SIEMENS HMI

Each FINAL program has an HMI and must be downloaded to the HMI panel separately.

PROGRAM ASSIST

The guides in the program assist are to assist in the development of the programs.

See the FINAL document for the lab problem's complete requirements.

*If you use just the assist you may not have receive full credit for the program because of missing requirements **detailed in the FINAL document.***

The Program Selection buttons will open the individual program assists.

Each screen has a button to return to the program selection.

SPOOLING uses two subroutines, use the **Continue** button to see the routine's assist.
